## RIM Eave Panel

### Description

The patented RIM Eave Panel is designed to mount on the roof eave and minimize the formation of icicles and ice dams during the Winter season. First developed in 1993, RIM Eave Systems have successfully eliminated icicle and ice dam problems on hundreds of commercial and residential applications.

### Specifications

Material Selection:	Copper or Kynar painted aluminum
Color Selection (Alum.):	Over 30 colors
Heating Cable Supplied:	3 runs per foot of panel Model SRH-1 for 120V operation Model SRH-2 for 208 to 277V operation
Panel Lengths:	Up to 10 feet per panel
Components Supplied:	Power connection kit(s), panel splice covers, panel end caps
Note:	Heated gutters and downspouts should be specified for eaves above walkways, driveways, decks and lower roofs.
