

VersaScreen IceBlaster Pro-

"I had GSB install the Ice Blaster Pro system in the rear upper gutter in my home. I had terrible problems with ice dams in this area in the past. Now the gutter is clear and I have zero issues with ice dams in this area. I have enclosed pictures taken the same day of the rear gutter and the front gutter in which I did NOT install the system. Clear ice damming in the front. The system works as promised and the entire experience was very professional with excellent work performed along with great communication. I would highly recommend this system for any homeowners who are experiencing ice damming problems." **(Gregg, Slinger, WI)**

VersaScreen IceBlaster Pro with EMS heated valley panels-

Greg, Just wanted to let you know how well the work that you did at our Trillium Lane, Slinger property last fall is working. I am beyond pleased halfway thru winter. We have had zero ice buildup thus far. After battling ice dams in three homes over near 40 years of home ownership, this is the first time I believe we have a solution. Might be the best \$3000 I ever spent.

Thanks again. And please feel free to use me as a reference or testimonial to the fact this does in fact take care of ice dam problems. **(M. Hiller, Slinger, WI)**

VersaScreen IceBlaster RE with Bylin RIM2 Valley Panels-

"We had been plagued with ice dams and icicles on the front and back of our home for years. Since the installation of the Ice Blaster Pro and VersaScreen Gutter Protection in 2011, we no longer have to deal with or worry about ice dams.

Greg has provided us with superb service. He is always available for answering questions and providing advice, and has even stopped out to check up on things. He definitely stands behind his workmanship and sells a quality product. **(B. Trapp, Sussex, WI)**

VersaScreen IceBlaster RE and Bylin RIM2 Valleys Panels-

"We both think it was the best money we ever spent on the house. No problems at all. I still want to finish that one bit that I didn't have you install. Sometime during the summer, if you're working on a job in the area, you could schedule it. No rush on that of course." **(J. Holmes, West Bend, WI)**

VersaScreen IceBlaster Pro-

"Wow talk about the poster child for clean and dry gutters. This stuff is the cats meow. Thanks so much for putting the increased heat cables in {VersaScreen IceBlaster Pro}, they worked fantastic. The rest of the house is hung like Doctor Zavargo house in Russia but not the back - all the gutters are snow and ice less." **(A. Collins, Stoughton, WI)**

VersaScreen IceBlaster Pro and heated valleys-

"Hi Greg, just wanted to follow up with you regarding the work you did at my Brookfield ranch house last summer . As you recall we had significant ice dam issues over the front door of the house when we bought it. The dam was 5-6 feet back on the roof and I estimate 15-18 inches deep at its peak. We also had Ice dam issues over our sun room addition. Over the summer you suggested cutting in a ridge vent and then add your roof heating system and gutter guards. (I also added blown cellulose insulation.) We all agreed this was the best approach and we began to install.

Over last winter we had zero ice dam issues over the front door or sun room. We could actually see the snow melting down the valleys and could hear the rain gutters dripping with melted snow . We are believers that by adding your valley and rain gutter heating system we had an ice dam free winter.

Please feel free to use us as a reference for those who have questions." **(Mark Bordeaux, Brookfield, WI. This testimonial can also be viewed on Angies List under GSB Services)**

Bylin RIM2 Valley Panels and heated gutter guards-

"I am very happy with the leaf cover and ice melting system I purchased from you. I had one valley area that caused ice damming and inside water leakage that your system solved completely. We have an all cement area we walk out onto in the back of the house. In the past, when I raked the snow off the roof I had to shovel all that snow up on the ground since we use that area as a walkway. Now with your heat cable system, no need to use the roof rake and no need to shovel all that snow. I just go into the basement and turn on the heat cable system and don't have to worry about it. I have many trees around our house and with your leaf covers the smallest debris cannot get into the gutters. It keeps them clear and no need to get up on a ladder to clean them. I checked out many systems and contractors and your system was by far the best.

You were very easy to work with and also in working with the electrician I used to do the inside wiring. I know he appreciated your knowledge and help. I look forward to many years of good use of this system. Every time in the fall when the leaves come down and then in the winter when the snow starts to fly I know I made a smart investment and the best choice with GSB Services." **(L. Radde, Wauwatosa, WI)**

Roof and Gutter Guard Ice Melt System-

"Offers roof and gutter de-icing solution. We had roof and gutter solution implemented along with installation of "gutter guards" to prevent debris from collecting in gutters. They provide great service, are willing to answer questions and are very responsive. Solved years of frustrating ice-dam issues with a simple, no-worry solution. Provided a courtesy follow up to ensure everything was working properly." **(Pete Mapants - Houzz Review)**

VersaScreen IceBlaster Pro installed on rear of house-

Hello Greg,

Just a quick follow up.

The system is working flawlessly !!
Rear gutter always clear. Front gutter currently with ice dam. I took some pictures and I'm not sure if you need any more testimonies but I am willing. **(G. Tucker, Hartford, WI)**
